TO USE RESTRICTIONS**

This document and the information it contains are proprietary to Elo Touch Solutions and cannot be used or reproduced without the prior written consent of Elo Touch Solutions and subject to its written use restrictions.

1.0 PURPOSE

As a reference document that specifies the environmental legislation and standard requirements for products and parts supplied to Elo Touch Solutions (Elo).

2.0 SCOPE

2.1 Content

This specification covers the applicable documents, regulations and requirements for supplier product environmental compliance.

2.2 Overview

The supplier requirements specified cover: 1) the elimination of "Banned Substances", 2) the controlled usage of "Restricted Substances", 3) the notification on the use/non-use of certain "Declarable Substances", and 4) the disclosure of material content information.

2.3 Application

This specification applies to all materials, parts, components, and products (including packaging materials where indicated) supplied to Elo, whether finished or semi-finished.

3.0 REFERENCED DOCUMENTS

3.1 Regulations and Standards

Elo Touch Solutions' requirements for suppliers are based on the following regulations and certain additional industry and customer requirements:

A. International

- a. Montreal Protocol on Substances that Deplete the Ozone Layer
- b. Stockholm Convention on Persistent Organic Pollutants
- c. ISPM-15 International Standards for Phytosanitary Measures, Publication Number 15
- d. IATA 2013 Dangerous Goods Regulations
- e. IMDG Special Provision 188 for Shipping Lithium Batteries

B. Europe

- a. Directive 2011/65/EU

EU RoHS (Recast)

NOTE: RoHS (recast) was published on 8 June 2011 and repealed Directive 2002/95/EC (RoHS) starting 3 January 2013. EEE product scope under RoHS recast will include 3 new categories that will progressively come into implementation towards 21 July 2019. RoHS (recast) continues to restrict the same hazardous substances with the same thresholds as RoHS, but have identified DEHP, DBP, BBP, and HBCDD as priority substances to be reviewed for possible inclusion in the near future into the directive. RoHS (recast) requires finished EEE manufactured in and shipped into the EU to bear the CE mark and requires manufacturers to keep a Declaration of Conformity and technical files to document conformity to the directive. All these new requirements may trigger more demands for test reports and systematic management in the supply chain.

- b. Directive 2015/863

Amending Annex II to Directive 2011/65/EU

- c. Directive 2006/66/EC

4.0 DEFINITION OF TERMS

- 4.1 **Article:** Object which during production is given a special shape, surface or design which determines its function to a greater degree than does its chemical composition.
- 4.2 **Banned Substances:** Substances whose intentional use is not permitted in any quantity for all indicated applications. If a threshold value is indicated, it applies only to impurities that are not intentionally added and the amount of impurity of the substance must be less than the threshold value.
- 4.3 **Button Cells:** Any small round portable battery or accumulator whose diameter is greater than its height and which is used for special purposes such as hearing aids, watches, small portable equipment and back-up power.
- 4.4 **CAS (Chemical Abstract Service) Numbers:** A unique registration numerical identifier for one chemical (substance).
- 4.5 **Consumer-Purchased Finished Goods:** Products that is sold to consumers and is ready for use by end users. Elo Consumer-Purchased Finished Goods include monitors, computers, and Interactive Digital Signage. Does not include components that are sold to customers who incorporate components into their Consumer-Purchased Finished Goods (e.g. touchscreens, touchcontrollers).
- 4.6 **Controlled Substances:** Controlled substances are consisting of Banned Substances, Restricted Substances, and Declarable Substances.
- 4.7 **Declarable Substances:** When Declarable Substances are present above the specified limits for the specified applications in any materials, parts, and products supplied to Elo, suppliers are required to inform and notify Elo of its presence and use.
- 4.8 **EEE (Electrical and Electronic Equipment):** Equipment which is dependent on electric currents or electromagnetic fields in order to work properly and equipment for the generation, transfer and measurement of such currents and fields and designed for use with a voltage rating not exceeding 1000 Volts for alternating current and 1500 Volts for direct current (Directive 2011/65/EU definition).
- 4.9 **EPP (Electrical and Electronic Products) :** The definition of electrical and electronic products, they refer to the devices and accessory products with rated working electrical voltages that do not exceed 1500V direct current and do not exceed 1000V alternating current and function by means of current or electromagnetic fields and generate, transmit and measure such currents and electromagnetic fields. Batteries are also within the scope. (SJ / T 11364-2014 definition).
- 4.10 **Full Material Declaration:** A full material declaration discloses 100% of the homogenous materials that are found in the supplied materials/parts and a 100% of all the substances that are contained in those materials. Materials or substances (whether "Intentionally Added" or not) contained in materials/parts purchased (and in turn incorporated into supplier's products) must be disclosed. It is recognized that in certain situations, 100% disclosure by CAS Registry Number may not be feasible due to confidentiality or proprietary nature of the information. In such case, a supplier declaration shall also be supplied to Elo.
- 4.11 **Homogenous Material:** one material of uniform composition throughout or a material, consisting of a combination of materials, that cannot be disjointed or separated into different materials by mechanical actions such as unscrewing, cutting, crushing, grinding and abrasive processes.
- 4.12 **Intentionally Added:** Deliberately used in the formulation of a product where its continued presence is desired to provide a certain characteristic, appearance, property, attribute or quality.
- 4.13 **Mixture:** A mixture or solution composed of two or more substances.

- 4.14 Packaging:** All goods made of any material of any nature to be used for the containment, protection, handling, delivery, and presentation of products from the producer to the customer or the consumer. Packaging can be categorized but is not limited to primary, secondary and tertiary packaging.
 - Note 1: Items are considered to be packaging if they fulfill the abovementioned definition without prejudice to other functions which the packaging might also perform, unless the item is an integral part of a product and it is necessary to contain, support or preserve that product throughout its lifetime and all elements are intended to be used, consumed or disposed of together.
 - Note 2: Packaging components and ancillary elements integrated into packaging are considered to be part of the packaging into which they are integrated. Ancillary elements hung directly on, or attached to, a product and which perform a packaging function are considered to be packaging unless they are an integral part of this product and all elements are intended to be disposed of together.
 - Note 3: Packaging does not include road, rail, air or sea containers
 - Note 4: The term "Packaging" is frequently used in the integrated circuit industry to simplify the term IC Packaging which refers to the final stage of semiconductor device fabrication, which is outside the scope.
- 4.15 Restricted Substance:** Substances whose presence above the specified limits for the specified application in any of the parts, products, and materials supplied to Elo are not allowed / restricted, unless a valid exemption applies. Valid EU RoHS exemptions are specified and listed in Table 4 in Section 7.4 herein.
- 4.16 Substance:** A chemical element and its compounds in the natural state or obtained by any manufacturing process, including any additive necessary to preserve its stability and any impurity deriving from the process used, but excluding any solvent which may be separated without affecting the stability of the substance or changing its composition.
- 4.17 Substance of Concern:** Substances that are not currently banned or restricted by Elo, but may be (or will be) banned/restricted in the future according to Industry Standards or upcoming regulations.
- 4.18 Supplier Declaration of Compliance:** A declaration by suppliers that certifies the compliance of the parts or products indicated in the declaration with the environmental legislations, standards, or substance restrictions the declaration references.

5.0 SAFETY

N/A

6.0 SUPPLIER REQUIREMENTS

6.1 Parts and Materials Compliance

For all parts and materials supplied to Elo, suppliers shall ensure that parts and materials comply with the chemical substance requirements, as specified in Section 7 (Substances in Products) herein.

- A. All materials and parts supplied to Elo shall not contain Banned Substances or Restricted Substances above the allowed threshold for the pertinent applications as specified in Table 1 herein, unless an applicable EU RoHS exemption applies.
- B. When Declarable Substances are present in materials or parts supplied to Elo above the threshold levels in applications specified in Table 2, suppliers shall notify Elo regarding the presence of the Declarable substance above the threshold limit.

6.2 Product Labeling

A. China RoHS

Under China RoHS, all of Elo's consumer-purchased finished electrical/electronic products will require proper China RoHS product labeling as specified in standard, SJ/T 11364-2014 and GB/T 26572-2011. These products also need to complete the China Green Product (CGP) SDOC label compliant with the China RoHS conformity assessment via self-declaration. **(Note 6)**

Suppliers of materials and parts that are used to manufacture electronic and electrical products do not need to mark their products. However, Supplier need to provide Elo with necessary information to help determine the final China RoHS markings.

B. EU RoHS Recast (Directive 2011/65/EU)

Consumer-purchased finished electrical and electronic goods: All of Elo's consumer-purchased finished electrical and electronic goods shall demonstrate compliance to EU RoHS Recast by the affixing the CE mark on the finished product visibly, legibly, and indelibly. Markings other than the standardized CE mark shall no longer be used to demonstrate compliance of consumer-purchased finished electrical/electronic products to EU RoHS as this is illegal starting 3 January 2013.

Other Elo Finished Goods: Compliance of other Elo products (i.e. non-EEE products, and non-consumer-purchased products), such as Bezels, Touch Screens, and Touch Controllers may still and shall be demonstrated by the non-standardized RoHS label specified in LABEL, EU Directive (SD503235) that Elo prescribes.

C. EU WEEE (Waste Electrical and Electronic Equipment) Directive

Under the EU WEEE Directive, Elo is responsible for registering as a WEEE producer and for making collection, recycling, and reporting arrangements in EU Countries where Elo:

- Manufactures and sells EEE (electrical and electronic equipment) under his own brand;
- Resells under its own brand EEE which is produced by other suppliers; or
- Imports/exports EEE on a professional basis into the Member State

Under the WEEE Directive, Elo consumer-purchased finished goods that is put into the market after August 13, 2005 shall bear the appropriate cross-out wheelee bin mark as specified in EN 50419 Standard.

D. EU Battery Directive

Batteries shall bear the appropriate crossed-out wheelee bin mark as specified in Annex II of Directive 2006/66/EC. Additionally, batteries with:

- More than 0.0005% of Mercury by weight of battery shall be marked with chemical symbol "Hg";
- More than 0.002% of Cadmium by weight of battery shall be marked with chemical symbol "Cd";
- More than 0.004% of Lead by weight of battery shall be marked with chemical symbol "Pb".

E. US Battery Act

Rechargeable batteries must bear the three chasing arrows or a comparable recycling symbol. Additional marking requirements apply for rechargeable Nickel-Cadmium batteries and Lead-acid batteries. These required labeling shall also appear on packaging of rechargeable batteries that are sold separately.

F. California DTSC Perchlorate Warning

The following label shall be on the shipping box of Elo products that contain perchlorate-containing material (e.g. lithium coin cell batteries). To ensure legibility of the label, a minimum font size of 10 Arial shall be used.

This warning is for California (USA) use only and applies to Lithium coin cell contained in device:
Perchlorate Material - special handling may apply.
See www.dtsc.ca.gov/hazardouswaste/perchlorate.

G. Taiwan CNS 15663

Labeling according to Taiwan CNS 15663 shall be in user manual of Elo's consumer-purchased finished electrical/electronic products. Labeling is composed of a diagram that discloses the applicability of RoHS

exemption, and presence of RoHS hazardous substances above threshold levels specified in CNS 15663 in different product components.

6.3 Product Packaging

A. Controlled Substances

Elo Banned Substance, Restricted Substance, and Declarable Substance requirements for packaging materials apply to all packaging materials supplied to Elo, as well as all packaging materials used to ship parts / materials to Elo or directly to Elo customers. Banned Substances, Restricted Substances, and Declarable Substances that may be found in and apply non-exclusively to packaging materials are denoted by “(May be present in packaging)” in the Application column of Tables 1 and Table 2.

B. Recycling Labels

Recycling Labeling requirements apply to suppliers that provide Elo packaging materials and suppliers whose packaging materials are used to supply products/materials to Elo that could ultimately reach Elo customers. *Packaging Specification* (ES600665) serves as a guideline for graphic component selection and placement on packaging carton for Elo finished goods, and includes specification for the recycling label that should be on packaging cartons.

C. Solid Wood Packaging Materials

All solid wood packaging materials, including solid wood shipping pallets, shall conform to ISPM-15 (International Standards for Phytosanitary Measures, Publication Number 15) and shall bear the appropriate IPPC symbol to demonstrate compliance.

D. Shipping Lithium Ion / Polymer Batteries

When shipping lithium ion batteries, suppliers shall pay attention to relevant prevailing regulations and ensure proper product packaging, package labeling, and shipping documentation. Transportation of Lithium batteries excepted from Class 9 Dangerous Goods classification is regulated by:

- IATA Dangerous Goods Regulation, if shipped by air
- IMDG special provision 188, if shipped by sea.

6.4 Statement of Compliance

Suppliers shall provide a statement in a manner prescribed by Elo certifying that materials and parts supplied to Elo are in compliance to the chemical substance requirements specified in Section 7 (Substances in Products). Upon request from Elo, suppliers shall provide documentation to demonstrate the basis for the compliance statements provided to Elo. Examples of acceptable documentation include:

A. Supplier Declaration of Compliance.

B. Physical Test Report Results from a nationally or internationally certified test laboratory with ISO 17025 Certification. Test center should be accredited to perform chemical testing of Electricals and Electronics.

C. Full Material Declaration.

6.5 Directive 2011/65/EU RoHS Recast Technical Documentation

Consumer-purchased finished electrical and electronic goods: Vendors shall draw up EU RoHS 2 Technical Documentation as specified in Directive 2011/65/EU and/or harmonized standard EN50581:2012 for all EEE supplied to Elo after January 1, 2013. Such Technical Documentation shall be maintained, updated, and made available upon request to Elo for 10 years following product release.

6.6 Legal/Notification Requirements

In addition to requirements referenced in this document, all suppliers shall comply with:

A. Any other legal and regulatory requirements applicable to any products provided to Elo.

B. Any additional legal, regulatory or customer requirements (of which supplier is aware) when such requirements would apply to products sold by Elo and into which supplier's products are incorporated. Suppliers shall notify Elo of any such additional requirements (of which supplier is aware).

7.0 SUBSTANCES IN PRODUCTS

This section specifies:

- The chemical substances that Elo Bans (B), Restricts (R), requires suppliers to Declare (D), and Assesses (A).
- The application in which chemical substance restrictions, bans, declarations, and assessments apply.
- The threshold limit, above which the use of the chemical substance for the specified application is restricted, banned, requires supplier declaration, or should be assessed.

These chemical substances are classified into the three categories. Banned Substances and Restricted Substances shall not be present above the specified limits for the specified applications in any of the parts and materials supplied to Elo, unless it qualifies for an exemption. Declarable Substances must be declared if present above the specified limits for the specified applications in all materials and parts supplied to Elo. Substances to Assess, though currently not regulated, might be restricted, banned, or required to be declared by Elo in the future.

Restricted, Banned, or Declarable substances that may be found in and apply non-exclusively to packaging materials are denoted by “(May be present in packaging)” in the Application column.

7.1 Banned / Restricted Substances

Table 1 below specifies the regulated chemical substances that are banned or restricted above the specified levels in materials and parts supplied to Elo. Substances covered by the EU RoHS may be present in parts and materials supplied to Elo above the allowed limits **ONLY IF** an exemption listed in Table 4 applies. When a supplier claims an EU RoHS exemption, they must provide technical documentation that specifies:

- The exemptions being claimed.
- The homogenous material containing the EU RoHS chemical substance above threshold levels.
- Explanation of the use or application of the chemical substance in the part / material and why they qualify for the exemption.

Table 1. Chemical Substances that are Banned or Restricted

Substance Category	Category	Threshold Level	Application
Directive 2011/65/EU – EU Restriction of Hazardous Substances			
Cadmium / Cadmium Compounds (Note 1)	R	100 ppm per homogenous materials	All components, materials, and parts that make up EEE. Exemptions may apply. (Note 2)
Chromium VI Compounds (Note 1)	R	1000 ppm per homogenous materials	All components, materials, and parts that make up EEE. Exemptions may apply. (Note 2)
Lead /Lead Compounds (Note 1)	R	1000 ppm per homogenous materials	All components, materials, and parts that make up EEE. Exemptions may apply. (Note 2)
Mercury / Mercury Compounds (Note 1)	R	1000 ppm per homogenous materials	All components, materials, and parts that make up EEE. Exemptions may apply. (Note 2)
Polybrominated Biphenyls (PBB) (Note 1)	R	1000 ppm per homogenous materials	All components, materials, and parts that make up EEE.
Polybrominated Diphenyl Ethers (PBDE) (Note 1)	R	1000 ppm per homogenous materials	All components, materials, and parts that make up EEE.
Bis(2-ethylhexyl)phthalate (DEHP) (CAS# 117-81-7)	R	1000 ppm per homogenous materials	All (Note 3)
Benzyl butyl phthalate (BBP) (CAS# 85-68-7)	R	1000 ppm per homogenous materials	All (Note 3)
Dibutyl phthalate (DBP) (CAS# 84-74-2)	R	1000 ppm per homogenous materials	All (Note 3)

7.2 Declarable Substances

Table 2 below specifies the chemical substances that must be declared by suppliers if the chemical substance is present above the specified threshold limits in parts and materials supplied to Elo. Declaration shall include information regarding the use and location of the chemical in the parts and materials supplied to Elo. Suppliers shall phase out the use of the chemicals listed in Table 2 if technically feasible.

7.5 Formaldehyde Ban in Wood Products Exemptions

Table 5 below lists out applications for which formaldehyde ban is exempted:

Table 5. Formaldehyde Ban in Wood Products Exemptions

#	Exempted Use / Application
1	Hardboard
2	Structural plywood, as specified in the standard entitled "Voluntary Product Standard—Structural Plywood" and numbered PS 1-07
3	Structural panels, as specified in the standard entitled "Voluntary Product Standard—Performance Standard for Wood-Based Structural-Use Panels" and numbered PS 2-04
4	Structural composite lumber, as specified in the standard entitled "Standard Specification for Evaluation of Structural Composite Lumber Products" and numbered ASTM D 5456-06
5	Oriented strand board
6	Glued laminated lumber, as specified in the standard entitled "Structural Glued Laminated Timber" and numbered ANSI A190.1-2002
7	Prefabricated wood I-joists, as specified in the standard entitled "Standard Specification for Establishing and Monitoring Structural Capacities of Prefabricated Wood I-Joists" and numbered ASTM D 5055-05
8	Finger-jointed lumber
9	Wood packaging (including pallets, crates, spools, and dunnage)
10	Composite wood products used inside a new: (A) vehicle (other than a recreational vehicle) constructed entirely from new parts that has never been— (i) the subject of a retail sale; or (ii) registered with the appropriate State agency or authority responsible for motor vehicles or with any foreign state, province, or country; (B) rail car; (C) boat; (D) aerospace craft; or (E) aircraft;
11	Windows that contain composite wood products, if the window product contains less than 5 percent by volume of hardwood plywood, particleboard, or medium-density fiberboard, combined, in relation to the total volume of the finished window product
12	exterior doors and garage doors that contain composite wood products, if: (A) the doors are made from composite wood products manufactured with no-added formaldehyde-based resins or ultra low-emitting formaldehyde resins; or (B) the doors contain less than 3 percent by volume of hardwood plywood, particleboard, or medium-density fiberboard, combined, in relation to the total volume of the finished exterior door or garage door.

7.6 US PBT Chemicals Final Rules Exemptions

Table 6 below lists out applications for which US PBT Chemicals Final Rules are exempted:

Table 6. US PBT Chemicals Final Rules Exemptions

Chemical	Exempted Use / Application
Decabromodiphenyl ether (DecaBDE)	Processing and distribution in commerce for recycling of plastic that contained decaBDE before the plastic was recycled (i.e., the plastic to be recycled is from articles and products that were originally made with decaBDE), and the articles and products made from such recycled plastic so long as no new decaBDE is added during the recycling or production process.
Phenol, isopropylated phosphate (3:1) (PIP (3:1))	<ol style="list-style-type: none"> 1.Processing and distribution in commerce for use in aviation hydraulic fluid in hydraulic systems and use in specialty hydraulic fluids for military applications; 2.Processing and distribution in commerce for use in lubricants and greases; 3.Processing and distribution in commerce for use in new and replacement parts for the aerospace and automotive industries; 4.Processing and distribution in commerce for use as an intermediate in the manufacture of cyanoacrylate glue; 5.Processing and distribution in commerce for use in specialized engine air filters for locomotive and marine applications; 6.Processing and distribution in commerce for use in sealants and adhesives; and 7.Processing and distribution in commerce for recycling of plastic that contained PIP (3:1) before the plastic was recycled (i.e., the plastic to be recycled is from articles and products that were originally made with PIP (3:1), and the articles and products made from such recycled plastic so long as no new PIP (3:1) is added during the recycling or production process.
Hexachlorobutadiene (HCBD)	The unintentional production of HCBD as a byproduct during the production of chlorinated solvents, and the processing and distribution in commerce of HCBD for burning as a waste fuel.

11.0 NOTES

1. Refer to Appendix A for list of applicable chemical substances
2. Refer to Table 4.1 and Table 4.2 for list of applicable RoHS exemptions. Refer to Table 5 for list of applicable exemptions for Formaldehyde restriction in wood products.
- 3 EU Commission delegated Directive 2015/863 of 31 March 2015 amends Directive 2011/65/EU by adding DEHP, BBP, DBP, and DIBP to the list of EU RoHS restricted substances. These new substance restrictions will apply from 22 July 2019 for Elo products. Elo asks that suppliers phase out by 31 December 2016.
4. This substance may be used for wood preservation and may be found in wood pallets used for shipment or in wood packaging. Since wood pallets used to transport products to Elo may be reused to transport Elo products to customers, all wooden pallets shall conform to the requirements specified herein. Under REACH, packaging and wood pallets are be considered as articles, and thus when REACH Candidate List SvHC (Substances of Very High Concern) are present in packaging above the 0.1% limit, suppliers shall notify Elo accordingly.
5. The listed PAH are restricted per EU REACH Annex XVII and shall not be present above 0.00001% by weight of rubber or plastic components that will come in direct contact with end users. This restriction will come into force on December 27, 2015. Elo asks that suppliers phase out by June 01, 2015 the use of these regulated PAH above specified threshold limit in products to be supplied to Elo to ensure regulatory compliance of Elo products.
6. On 12 March 2018, Ministry of Industry and Information Technology (MIIT) published "The Standard Management Catalogue of Limiting the Use of Hazardous Substances in Electrical and Electronic Equipment (EEE) (first batch)" and "the Exemption List to the Use of Restricted Substances in the Standard Management Catalogue", under China RoHS 2, which shall enter into force on 12 March 2019. On May 16, 2019, China's State Administration for Market Regulation (SAMR) and the Ministry of Industry and Information Technology (MIIT)

published the "Implementation guidelines for the Conformity Assessment System for the Restriction of Hazardous Substances in Electrical and Electronic Products" (hereinafter referred to as the "Implementation Guidelines"). All products listed in the "China RoHS compliance management catalogue" that are manufactured or imported after November 01, 2019, must comply with these Implementation Guidelines.

7. On May 2, 2013, a decision was made to add HBCDD to Annex A of the Stockholm Convention on Persistent Organic Pollutants. As this amendment to the Stockholm Convention will enter into force on November 26, 2014, Elo asks that suppliers phase out by November 26, 2014 the use of HBCDD in products to be supplied to Elo.

8. In September 2015, the European Court of Justice held that EU importers notify and communicate to their customers when the product they import is or contains an article that contain a substance listed in the EU REACH SVHC Candidate List above 0.1% by weight of the article. Starting on February 01, 2016, Elo suppliers shall investigate presence of EU REACH SVHC Candidate List in products supplied to Elo not only on the product level, but on the component level. For example, if a REACH Candidate List SVHC is present above 0.1% by weight of a resistor or transducer contained in a monitor supplied to Elo, the monitor supplier will need to notify Elo of the presence of the Candidate List SVHC in the resistor or transducer, even if the Candidate List SVHC are not present in the monitor above 0.1% by weight of the monitor.

9. Regulated chlorinated flame retardants are not listed in the Chlorinated Fire Retardant table above and are listed in separate tables. Example: Short-chain chlorinated paraffin and TCEP, etc.

10. Four mandatory national standards for China VOCs(GB 30981-2020, GB 33372-2020, GB 38507-2020, GB 38508-2020) were released on March 4, 2020. Except GB 38507-2020, which will be implemented on April 1, 2021, the other standards will become effective on December 1, 2020.

11. On January 6, 2021, the U.S.Environmental Protection Agency (US EPA) published final rules (40 CFR 751.401-751.413) to regulate five persistent, bioaccumulative and toxic (PBT) chemicals under Section 6(h) of Toxic Sustances Control Act (TSCA). These rules have been implemented since March 8,2021. Refer to Table 6 for list of applicable exemptions for US PBT Chemicals Final Rules.
